

## Non Woven Abrasives

### GENERAL CHARACTERISTICS AND COMPOSITION

---

|  |                                    |
|--|------------------------------------|
| Mass per unit area (g/m <sup>2</sup> ) | 400 +/- 5%                         |
| Thickness (mm)                         | 5 +/- 1                            |
| Fibre                                  | Synthetic fibres                   |
| Resin                                  | Thermosetting resin                |
| Abrasive grain                         | Minerals                           |
| Pigments                               | Water based pigments               |
| Use                                    | Domestic                           |
| Colours                                | Green, Orange, Black, White, Brown |
| Maximum width (cm)                     | cm 102 (± 2 cm).                   |
| Maximum length (cm)                    | 5.000 cm                           |
